Guide: Using the Electronic Journals Library (EZB) off campus

The Electronic Journals Library (EZB) is a service for the effective use of scientific full-text journals on the Internet. It offers fast, structured and standardized access to scientific full-text journals. Important: In the EZB you search for a journal title - not for articles in journals.

The access options to full-text articles are indicated by different coloured traffic light symbols depending on the institution. As a member of the HFT you can authenticate yourself via Shibboleth to use the EZB off campus. On the "Search & Find" page, go to "Journals" -> "EZB electronic journal database". You are now on the EZB homepage.

Next, you will be taken to the website of the journal provider (EBSCOhost, WISO, SpringerNature etc.). There you can search for a specific issue or browse the journal.

Here is an example from SpringerNature. With other providers, the further procedure may be different.
